SUMMARY

Software Development Engineer with 4+ years of experience in designing, developing, optimizing, and maintaining scalable enterprise web applications using C#, ASP.NET Core, .NET Framework, REST APIs, MS SQL Server, and Microsoft Azure. Experienced in CMS-based website development with Umbraco CMS and Squidex for BBC Studios, along with strong hands-on experience in backend services, database design, WCF to .NET Core Web API migration, performance optimization, debugging, IIS deployment, and CI/CD release processes using TeamCity and Octopus Deploy. Skilled in translating business requirements into reliable technical solutions, improving application performance, supporting production systems, and delivering maintainable code in Agile development environments.

Education

- Malnad College Of Engineering, Hassan** 2017 - 2021
Bachelor of Engineering - Information Science and Engineering CGPA: 8.72
- Sri Venkateshwara P U College, Hassan** 2017
Pre-University Course - Science Percentage: 85.66
- Sri Aravinda High School, Hassan** 2015
Class 10th Percentage: 88.64

Technical Skills

Languages: C#, SQL

Frameworks & Libraries: ASP.NET Core, .NET Framework, Entity Framework Core, LINQ, MVC, Umbraco CMS, Squidex

Databases: MS SQL Server, Oracle

APIs & Protocols: REST API

Cloud: Microsoft Azure

CI/CD & Deployment: TeamCity, Octopus Deploy, IIS

Developer Tools: Visual Studio, VS Code, Git, GitHub

Core Skills: Backend Development, Database Design, Performance Optimization, Debugging, Code Review, SDLC, Object Oriented Programming, Data Structures and Algorithms

Soft Skills: Problem Solving, Communication, Team Collaboration, Adaptability, Time Management, Critical Thinking

WORK EXPERIENCE

- HCL Technologies Limited** Feb 2025 - Present
Lead Engineer
Client: BBC Studios
 - Leading the development and maintenance of enterprise-level digital platforms and CMS-driven websites using C#, ASP.NET Core, Umbraco CMS, Squidex, and Microsoft Azure.
 - Implementing backend services, reusable CMS components, and content management workflows to support scalable publishing and delivery requirements.
 - Working on REST API integrations, data handling, configuration management, and application enhancements for production systems.
 - Collaborating with business stakeholders, QA teams and developers to deliver stable and production-ready releases.

- Managing build and deployment activities using TeamCity and Octopus Deploy across multiple environments.
- Participating in requirement analysis, technical discussions, code reviews, debugging, defect fixing, and release support activities.

Key Projects:

- BBC Studios Digital Creative: CMS-based platform for managing and delivering digital content.
- BBC Polska: CMS-based platform for managing and delivering multiple template site page dynamically.
- BBC Africa Channels - Hidden Gems Campaign: Campaign website for BBC Africa.

● **Surya Financial Technologies Private Limited**

Jun 2022 - Feb 2025

Software Development Engineer - II

- Designed, developed, and maintained enterprise web applications to modernize legacy architectures, improving code maintainability, scalability, and performance.
- Led the migration of services from WCF to .NET Core Web API, resulting in a 40% improvement in system performance and enhanced scalability.
- Developed backend services, business logic, and database-driven modules using C#, ASP.NET Core, .NET Framework, REST APIs, and MS SQL Server.
- Collaborated with clients and business stakeholders to gather requirements and convert them into clear technical specifications.
- Built analytics and reporting modules to support financial forecasting, risk analysis, and business decision-making.
- Managed data migration and ETL processes, ensuring smooth transitions with high data integrity and accuracy.
- Deployed applications using IIS in production environments, ensuring reliable, secure, and stable hosting.
- Mentored junior developers by providing guidance on coding standards, debugging practices, code quality, and project workflows.

Key Projects:

- PFS - Planning and Forecasting System: Developed a report-based financial forecasting system using .NET Core and MS SQL Server, enabling streamlined data handling and accurate forecasting results.
- IRRBB - Interest Rate Risk in the Banking Book: Built a reporting and risk analytics solution for real-time risk aggregation, improving visibility into interest rate risk.
- Risk Aggregator: Designed and implemented a solution for consolidating risk data from multiple financial sources, improving data accuracy and supporting comprehensive risk analysis.

● **Surya Software Systems Private Limited**

Aug 2021 - May 2022

Software Development Engineer - I

- Assisted in the development and maintenance of web applications using ASP.NET, C#, .NET Framework, and .NET Core.
- Implemented backend services, business logic, and database-related enhancements under the guidance of senior developers.
- Focused on bug fixing, troubleshooting, and code optimization to improve application reliability and performance.
- Participated in requirement analysis and converted business needs into technical development tasks.
- Supported development of data validation workflows and database-driven modules to improve accuracy and reliability.
- Contributed to deployment processes, configuration updates, and troubleshooting during release cycles.
- Maintained existing applications by identifying improvement areas and applying performance and stability enhancements.
- Collaborated with project teams to resolve technical issues and support successful project delivery.

Key Projects:

- BASEL: Supported performance improvement and compliance-related enhancements by contributing to risk assessment features and regulatory reporting workflows.
- PFS - Planning and Forecasting System: Contributed to the development of a report-based forecasting system by improving data handling, validation, and backend processing.
